

Figure 1.—Mature-run equivalent exploitation rate (%), spawning escapement, and threshold reference lines for exploitation rate and spawning escapement by CY for the Nehalem stock of Chinook salmon, 1979–2017. Cumulative mature-run equivalent exploitation rate calculated from the SRH CWT exploitation rate indicator stock.

Figure 2.—Mature-run equivalent exploitation rate (%), spawning escapement, and threshold reference lines for exploitation rate and spawning escapement by CY for the Nehalem stock of Chinook salmon, 1979–2017. Cumulative mature-run equivalent exploitation rate calculated from the nehalem CWT exploitation rate indicator stock.

Figure 3.—Mature-run equivalent exploitation rate (%), spawning escapement, and threshold reference lines for exploitation rate and spawning escapement by CY for the Siletz stock of Chinook salmon, 1979–2017. Cumulative mature-run equivalent exploitation rate calculated from the SRH CWT exploitation rate indicator stock.

Figure 4.—Mature-run equivalent exploitation rate (%), spawning escapement, and threshold reference lines for exploitation rate and spawning escapement by CY for the Siletz stock of Chinook salmon, 1979–2017. Cumulative mature-run equivalent exploitation rate calculated from the siletz CWT exploitation rate indicator stock.

Figure 5.—Mature-run equivalent exploitation rate (%), spawning escapement, and threshold reference lines for exploitation rate and spawning escapement by CY for the Siuslaw stock of Chinook salmon, 1979–2017. Cumulative mature-run equivalent exploitation rate calculated from the SRH CWT exploitation rate indicator stock.

Figure 6.—Mature-run equivalent exploitation rate (%), spawning escapement, and threshold reference lines for exploitation rate and spawning escapement by CY for the Siuslaw stock of Chinook salmon, 1979–2017. Cumulative mature-run equivalent exploitation rate calculated from the siuslaw CWT exploitation rate indicator stock.
